

Jack, first off let me say WOW, I purchased this 1999 Volvo VN610 in November of 1998. After installing Airtabs™ last week, my truck has never handled any better. The best way to describe it is its like having a Tail Wind every where I drive. My truck and Trailer handle better in windy or no windy conditions. And in the Rain what a difference, I could see better out the back of the unit than I could out the front. I am enclosing Picture of the installation of the Airtabs™ , Installation was easy and only took about 1 hr 45 min to do both tractor and trailer. I don't have any fuel savings data yet as they have only been on my truck for about 1 tank of fuel, but will let you know in my next letter. This product is probably one of the easiest to use and like I said has improved the handling of my vehicle immensely.

Thank you,

Hershey Bar
